

Nathan Casto is from Given, WV. He joined FFA during his sophomore year at Buffalo High School, and his advisor was Mrs. Danielle Grant. He first joined as a way to show his Market Steer SAE at the county fair, however, he quickly realized what all FFA was about and had to offer. FFA encouraged and shaped him into a leader and it gave him more purpose and direction throughout high school. He served as Chapter Vice President his senior year. Nathan also enjoyed competing in several competitions including Agriscience Fair, Ag Issues, and Marketing Plan; all of which his teams competed at the national competition. Outside of FFA he was part of the high school basketball team and NHS. This year Nathan will be a freshman at WVU Institute of Technology where he is majoring in Chemical Engineering. During his year as the 2016-2017 Northeastern Region Vice President At-Large he hopes to positively impact fellow members and encourage the next generation of leaders across the state.
