

WEST VIRGINIA STATE FFA
ZERO TURN OPERATING AND MAINTENANCE CONTEST
High School Division

| | | |
|--|--------------------------|---|
| Scanton | Universal Form C #705C-1 |  |
| Committee: Chair: Seth Neal Eastern – Cody Dent Central – Nick Cox Northcentral – Gene Hovatter Northeast – Chris VanDyne Northwest – John Smith, Kari Brown, Wendy Knopp Southeast – Shelby Adkins Southwest – Tim Kidwell | | |

Annual meetings will be held after the State Contest is held. Any questions, comments, or concerns can be addressed at this meeting.

EVENT PURPOSE AND OBJECTIVE:

Encourage youth to:

1. Develop leadership character and good citizenship
2. Develop skills and attitudes necessary to safely operate tractors and other equipment.
3. Practice basic and routine tractor care, repair, and maintenance.
4. Demonstrate their knowledge and skill in the areas of lawn care, business management, and tractor operation

EVENT RULES AND REGULATIONS:

Any student which is enrolled in agricultural education and is an FFA member is eligible to participate. This includes 9-12 grade students. Three students from each region may participate in the state event. State winners who have competed in the tractor operations' contest in previous years are not eligible to compete.

1. Appropriate Dress-Comfortable shirt and pants, and work shoes/Boots.
2. **Any contestant who does not report on time (without prior arrangement) shall be disqualified!**
3. Only members with previous tractor driving experience will be allowed in the contest.
4. **Each contestant must complete all events.**

Use of Technology in WV CDE and LDE events

1. The use of all electronic devices are prohibited once the career development events starts. If an event requires the use of calculators, the event coordinator will provide exact specifications on the type(s) of devices (including functions) that will be permitted.
2. If a contestant is observed using an electronic device during a contest (**student has his/her Scantron in hand**), the group leader will record the student's name, school and contestant number and give it to the contest coordinator and/or the results tabulator. This individual will be **disqualified** from the contest.

EVENT FORMAT/SCORING

The contest will consist of **Four** Events, each of which will be scored separately.

- I. Written Test
- II. Problem Solving
- III. Tools Parts Identification
- IV. Lawnmower Driving
2. Equipment will be provided for each event. All contestants will use the same tractor for each event.
3. All persons other than the judges, the scorers and the contestants will be barred from the contest area during the contest.
4. The Superintendents in charge of this contest will select judges and scorers.
5. In case any situation occurs that is not covered in the rules, the decision of the judges will be final.
6. Meet at the Craft House – Thursday at 8 am. Contestants will have time to FAMILIARIZE themselves with the tractors before the contest begins.
7. **The contestant with the lowest deductions will be the winner.**

WEST VIRGINIA STATE FFA
ZERO TURN OPERATING AND MAINTENANCE CONTEST
High School Division

EVENT I – Written Exam

- A. Contestants will have **30** minutes to answer fifty (**50**) multiple choice questions on lawnmower servicing, safe operation, care, and maintenance.
- B. The test will include multiple-choice questions.
 - a. See Test Bank for example Test Questions
 - i. www.wvffa.net/Programs
- C. Each question answered incorrectly or left unanswered will be valued at ten (**10**) points.

EVENT II – Problem Solving

- A. Contestants will have **30** minutes to answer ten (**10**) multiple choice problem solving activities relating to lawnmower servicing, safe operation, care and maintenance.
- B. The test will include multiple-choice questions. Students will have to search repair manuals to find answers.
 - a. See Test Bank for example Test Questions
 - i. www.wvffa.net/Programs
- C. Each question answered incorrectly or left unanswered will be valued at twenty-five (**25**) points.

EVENT III – Parts Identification

- A. Each contestant will identify mechanic tools and tractor parts from a gas or diesel Zero Turn. A total of **30** tools and parts will be identified. They may include a torque wrench, open-end wrench, flywheel, piston, or starter etc. Contestants will choose from a bank of answers.
- B. Refer to www.snap-on.com, www.valu-bilt.com or www.craftsman.com.
- C. Items used for identification will come from the Zero Turn Parts Identification sheet in this packet
- D. Each correct answer missed or left unanswered will be valued at ten (**10**) points.

EVENT IV – Lawnmower Driving

The following lawnmower operations will be tested:

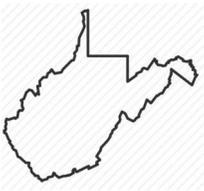

- A. Explaining pre-warm up procedure.
- B. Driving the lawnmower out of the shed area.
- C. Driving the lawnmower through a course lined with stakes not more than two feet apart with 6” clearance on each side.
- D. Returning the lawnmower to the “shed” in the reverse position, the wheels of the mower must be centered in the “shed.” Width of the shed will be the same as the alley width.
- E. Checking/setting mowing height (height to be determined by the judge).
- F. Contestants will have a maximum of four (**4**) minutes to navigate the course without penalty. Time will be stopped after six (**6**) minutes and deductions will be added
- G. Time begins when the lawnmower leaves the shed and stops when the lawnmower is parked and turned **OFF**.
- H. **See score card for deductions.**

TIE BREAKERS

- A. In the event of a tie in the overall contest, the contestant with the highest driving score will be declared the winner. Second place will be the contestant with the highest problem solving score, while third place will be the contestant with the highest written exam score.

COURSE LAYOUT

- 1. The operation portion of this contest shall take place on a relatively level area that shall not exceed an area that measures 50’ X 75’. The boundaries of this area will be marked. Any contestant that crosses the boundaries of this area during the operation portion of this competition will be disqualified.
- 2. The mower will be stationed in a “shed” outside of the course/alley area the boundaries of which will be clearly identified by cans, cones or other similar objects. The shed width will be not less than the mower deck discharge chute + 12” (discharge chute must be in the up position). A start/finish line will be clearly identified on the shed boundaries and the student’s time will begin when the front wheels of the mower cross the line. Students will pull the mower straight out of the shed to begin the course and will back the mower into the shed after completion of the

WEST VIRGINIA STATE FFA
ZERO TURN OPERATING AND MAINTENANCE CONTEST
High School Division

driving course. The discharge chute must be raised before entering the shed. The front wheels must cross the start finish line. The rear wheels of the mower should be centered in the shed. The student's time will end when the contestant switches the mower off upon completion of the course.

3. The "alley" will consist of two 90 degree angles that form a "step" shape. (Imagine a line that runs east for 20', turns south for 15', and then continues east for 15'). All measurements for the "alley" will be based on this marked line. The width and all openings for the "alley" will be determined based upon the diagonal width of the mower (diagonal width measured from the center of the inside front wheel to the outside center of the opposite rear wheel) or the width of the mower deck + discharge chute + 12" **whichever is widest, for competition.**
4. An object (hammer, shoe, toy, etc.) will be placed in the alley. **The contestant will need to stop the mower, turn off the engine, dismount the mower and remove the object from the alley.** Then the contestant is to resume driving the through the alley.
5. An 8' x 8' area will be designated as an area that the contestant has to pull into and back-up for repositioning of the mower and pull into again and then back-up and resume driving through the alley.
6. Two five-gallon buckets, two barrels, or two automobile tires will be placed in the course so that the contestant will have to circle each, as if they were mowing around trees, before returning the mower to the shed. These objects will be set apart determined by the **diagonal width** measured from the center of the inside front wheel to the outside center of the opposite rear wheel + 12 inches or the deck width + discharge chute + 12" whichever is greatest. Markers from the buckets, barrels, or tires will be set at the same width apart.
7. A marker is considered scraped when it has been touched or moved by any part of the mower. An "**upset**" will be considered as moving a marker from its station.
8. The course will be navigated with the mowing deck set at a cutting height to be determined by the judge and with the discharge chute lowered. The mower PTO will **NOT** be engaged.
